DETAILED ACTION

This action is a response to the application filed on December 08, 2000. The drawings filed on January 16, 2002 have been received.

Specification

The disclosure is objected to because of the following informalities: on page 11, line 15, "base edge 32" is inconsistent with the drawings Fig. 2, shown as "33". Also pg. 15, line 4, "apparatus 20" should be - -30--.

Appropriate correction is required.

The abstract of the disclosure is objected to because it contains more than one paragraph.. Correction is required. See MPEP § 608.01(b).

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "T", "V", and "U" shaped couplings must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3731

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 3, 11-15 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Scholz et al (US Patent 6,273,912).

Claims 1-10, 17, 23, 33 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Angelchik (US Patent 4,352,358).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-22, 24-25, 26-32 and 34-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Angelchik.

Art Unit: 3731

The Angelchik patent discloses that the attachment from the tubular member to the annular member 10 (anastomosis coupling) by any suitable technique. The securing techniques recited in claims 18-22 and related claims above are well known in the art. It would have been within the purview of one having ordinary skill in the art to secure coupling of Angelchik to the hollow organ 11 by the claimed techniques in view Angelchik's teachings. In regards to claims 24-25 and related claims directed to the specific hollow organ; once it is known in the art to cause anastomosis of an artery, would have been obvious to one have ordinary skill in the art to affix the coupler to coronary arteries as well.
